SKY GUIDE Africa South – 2015

Astronomical Handbook for Southern Africa

THE BOOK

Sky Guide Africa South 2015 is a practical resource for astronomers, whether novice, amateur or professional. It covers the upcoming year's planetary movements, predicted eclipses, meteor showers – any events and facets of the night sky that change annually. Star charts plot the evening sky for each season, facilitating the identification of stars and constellations. There's a wealth of information about the Sun, Moon, planets, comets, meteors and bright stars, with photos, diagrams, charts and images. There's also an excellent list of useful websites and a comprehensive glossary.

This annual publication is an invaluable resource for anyone who has even a passing interest in the night skies of southern Africa and is '... an absolute must for first-time star-gazers and professional astronomers alike'.

THE AUTHORS

Struik Nature joins forces with the Astronomical Society of Southern Africa to publish this annual guide. Now in its 65th year of publication, the book is prepared by a team of contributors, all specialists in their fields.
